Education

Cambridge International A Levels Homebridge by Beaconhouse	2025 – 2027
Cambridge O Levels The Froebel's School	2023 – 2025

Professional Experience

SOC Analyst Intern ITSimplera Institute	Jul 2026 – Sep 2026
- Configured and deployed a Wazuh SIEM environment including Wazuh Dashboard, Wazuh Indexer and Filebeat for centralized security monitoring. - Configured and managed pfSense firewall environments while monitoring network traffic and strengthening network security. - Performed log analysis, threat detection, incident investigation and security monitoring while gaining practical SOC experience.	
Cloud Computing (AWS/Azure) Intern Decode Labs	Jul 2026 – Aug 2026
- Hosted static websites using Microsoft Azure Blob Storage and gained practical exposure to Amazon S3. - Worked with cloud storage, networking, identity management and cloud security through hands-on projects. - Developed practical knowledge of Azure and AWS cloud deployment workflows and best practices.	
Junior Cybersecurity & Python Instructor UTech Digital Education	Dec 2024 – Present
- Mentored more than 30 students in Python programming through live coding sessions and practical projects. - Currently teaching 20+ students cybersecurity including Linux, networking, OSINT, web security and the Cyber Kill Chain. - Designed practical labs and exercises to strengthen students' technical and analytical skills.	

Technical Skills

Cloud Computing

- Microsoft Azure
- Amazon Web Services (AWS)
- Azure Blob Storage
- Amazon S3

Cybersecurity

- Wazuh SIEM
- Security Monitoring
- Threat Detection
- Incident Analysis
- Log Analysis
- pfSense Firewall
- OSINT
- Network Security

Programming

- Python
- HTML
- CSS
- JavaScript

Networking

- TCP/IP
- DNS
- Firewalls
- Network Traffic Analysis

Professional Skills

- Communication
- Team Collaboration
- Problem Solving

Projects

- **Cloud Portfolio Website**
Designed and deployed a responsive personal portfolio using Microsoft Azure Blob Storage Static Website Hosting without provisioning a server.
[Live Portfolio](#)
- **Wazuh SIEM Deployment & Security Monitoring**
Configured and deployed a Wazuh-based SIEM environment for centralized log collection, monitoring and threat detection.
[GitHub Repository](#)
- **pfSense Firewall with Suricata & pfBlockerNG**
Configured pfSense Firewall with IDS/IPS (Suricata) and DNS/IP filtering using pfBlockerNG.
[GitHub Repository](#)

Certifications

- Generative AI with Python — UTech
- Data Science and Machine Learning with Python — UTech
- Game Development with Python — UTech
- Practical Linux for Hackers — CybeRace
- Cybersecurity — Google
- Python Essentials 1 & 2 — Cisco
- Introduction to Cybersecurity — Cisco
- Introduction to Cybersecurity Awareness — HP
- Effective Leadership — HP
- Essentials of AI Learning Frameworks and Advanced Models — UniAthena

Languages

English (Fluent) | Urdu (Native)
